BELLYDANCE AFTER DARK CLASSES

Belly Basics with Living Truth Movement

If you've never tried bellydance before this class is for you! If you are already a dancer and want to brush up on some basics this class is also for you! No props required.

Lost In Translation with Jack Flint

Would you believe me if I told you I learned ropedart from a hooper? What if I said I wouldn't have learned my poi flowers without juggling clubs? Well you better believe it! Have you ever wanted to learn a new prop? This workshop is for you. We will begin with a brief discussion about the protégé effect, and kinesthetic learning. Then, using these new concepts, we will explore and learn to translate moves from one prop to another. Come with any and all props you want. I promise you will walk away with more confidence in your own props AND knowing moves on a new prop.

The Art of Fleshing with Aneaj

Skin safety, fuel for fleshing, Making fleshing torches, dancing and fleshing

No Drums Allowed Sound Circle with Ka Doum

A fun time of creating rhythm using zills, shakers, bells, bowls, blocks, voice, and hands.

Dancing with Palm Torches with Samira

Curious about fire dance but not sure where to start? Palm torches are the perfect gateway prop. In this workshop, you'll learn how to build and improvisational set that feels safe, fluid, and visually captivating. We'll be learning how to frame with light and how to move with the prop to let your dance become a ritualistic fireside story.

Dancing with a Hoop with ChelseyLooGuru

Hoop (1. Waist hooping 2. Isolation fun 3. locking/pinch points 4. escalators 5. Dancing with your hoop/ planes)

Whip Cracking Basics with Moonzie

Basic whip cracking techniques and understanding.

Everything is a Drum and Every Move is a Dance

My intention is to guide new people into drumming with dancers. I offer some simple techniques to get everyone involved with rhythms like Baladi, Chiftitelli, Maqsum, and other undiscovered rhythms within us all.

Fire Scimitar with Samira

We'll cover balance points, frames, transitions, and tricks - but also dive into how heat, fire, wind, and weight shift changes the way this prop behaves. Fire changes everything, and this class will teach you how to move with it, not against it.

Tame Your Dragon with ChelseyLooGuru

Dragon Staff: (chi roll forward and backward, balancing/dancing , planes, cheating death)

Ropedart 101 with Jack Flint

The class will start with anchoring our rope darts. From there we will learn how to turn, followed by different types of shots (foot, elbow, and knee). We will finish the class up by showing one of my favorite ways to string everything together and a fun way to practice all things learned within the workshop.

Drum Circle with Kaylanaa

No percussion guru status expected. Just bring your drum, your curiosity, and a willingness to get a little rhythmic

Sacred Triangle with PixMar

Learn how energy of dance, drumming and fire work together to create and feed energy together cohesively

You will Learn Poi... Eventually with Jack Flint

This workshop is for all those brand new to poi. We will focus on beginner moves and drills to use to help make your lines and flowers beautiful. This class is to give you the foundations to take home and practice on your own. If you run these drills you will learn poi. If we have enough time within the class we may even learn beginner tosses.

Fire Eating Foundations with Samira

This hands-on workshop is designed to help you get comfortable working with fire while building confidence and control. We'll start with exercises to get familiar with the element, work through fleshing techniques and build toward your first fire-eating extinguish, with plenty of guidance along the way.

Fire or LED Fans for Bellydance with Living Truth Movement

You know the bellydance moves, but now what the heck do you do with these multi-tined flaming things in your hands? We'll cover some very basic go-to fan manipulations to pair with your dance foundation. This is BYOF - bring your own fans!

Fire Bubbles with PixMar

Everyone enjoys bubbles. How about bubbles that are fire! Come learn to throw fire balls safely, like a wizard. Safety instructions, Fire Bubble instruction, demonstration, then the opportunity to do your own.
